

FIRST & ONLY IN COLLIER COUNTY

CAD digital mammography

EARLIER DETECTION OF BREAST CANCER

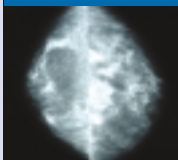

Now only at NDIC, digital mammography has replaced old film technology – providing quicker, clearer and more reliable information and faster more comfortable exams, too. Even more, the system uses Computer-Aided Detection, technology that highlights any abnormalities it detects, and alerts the radiology physician to focus on these areas.

DIGITAL MAMMOGRAPHY

Over 23% of breast cancers can be detected earlier.

Traditional Film

As a result, 23.4 % more cancers can be detected earlier, at a more treatable stage. For technology that is changing women's breastcare forever, call NDIC.

**No physical referral necessary
for screening mammograms**
